

PetterssonApps

PetterssonApps is looking for a Junior/Middle Project Manager in Uzhhorod!

PetterssonApps is a dynamic and rapidly growing IT company with headquarters in Uzhhorod and a branch in Drohobych. We specialize in the development of websites, mobile applications, and software for digital media players on TV platforms. With over 150 skilled professionals, we provide IT outsourcing services to clients worldwide, delivering innovative and high-quality solutions.

We are always evolving, striving for excellence, and eager to bring new talent into our expanding team.

Vacancy:

• Junior/Middle Project Manager.

Requirements for candidates:

- project management experience, supporting the entire project development cycle (including communication with customers, requirements analysis, architecture, design, implementation, documentation, testing, deployment, and maintenance);
- technical foundation and understanding of the life cycle of IT project development, encompassing design development, mobile applications, websites, CMS, back-end, TV applications, etc. (will be a plus);
- familiarity with Agile/Scrum/Kanban/Waterfall methodologies;
- proficiency in task management tools at the user or administrator level (e.g., Youtrack, Jira);
- upper-intermediate level of English or higher (knowledge of other languages will be a plus).

Responsibilities:

- maintain effective communication with customers, stakeholders, representatives of the customer's team and company management;
- participate in project evaluation and planning under mentorship;
- manage development iterations, including task creation and monitoring of implementation;
- provide project team management and consultation for designers, developers, and QA teams at all project stages (analysis, evaluation, performance evaluation, planning, development, testing, status reporting, retrospectives);
- identify and manage project priorities;
- demonstrate work results and conduct demos for management and customers;
- manage changes in project scope and costs;

- promote process improvement by identifying inefficiencies, proposing improvements, and implementing them;
- provide accurate and timely information, data, and reports on project status, activities, and results.

The company offers:

- work on large-scale, engaging IT projects;
- a young, motivated, and supportive team;
- competitive salary with regular performance reviews;
- comfortable office in Uzhhorod;
- healthy work-life balance;
- flexible working hours (8-hour workday);
- 20 days of paid vacation per year (with flexible distribution);
- public holidays.

Salary: negotiable.

Working hours: Mon-Fri: 09:00-18:00 or 10:00-19:00 (can be flexible).
