Certificate

I hereby confirm that Prof. Ivan Nebola has successfully completed his scientific and pedagogical training at the Magnetism Department of the Institute of Experimental Physics of the SAS (Košice, Slovak Republic) during November 5 – November 26, 2024 on the topic: "Study of innovative experimental and theoretical methods for studying multi-particle objects at high electromagnetic fields in order to improve work programs in academic disciplines".

Training includes, in particular, acquaintance with the scientific experimental base and methods of conducting scientific research, with computer and software, as well as improvement and adaptation of the program of the course "Quantum mechanics" (90 hours in total).

This training was coordinated by Prof. Peter Kopcansky (leading scientific worker of the Institute – Head the project).

Best regards

Natalia Tomasovicova
Head of Department of Magnetism
